Kawe Longon

FRONT END & FULL-STACK ENGINEER

+39 378 0639 622 | kawe.longon@gmail.com | Treviso (TV), Italy | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Front end engineer (React, Next.js, TypeScript, Flutter) who also builds the layer behind the interface: Postgres with row-level security, offline-first sync, server-side validation and rate limiting. Delivers work that can be measured: a shift-planning app in daily use at a bar-restaurant, 100/100/100/100 Lighthouse on a deployed Next.js site, about 350 automated tests with CI on a local-first PWA, and a 20% load-time reduction on a corporate portal at STIGA. Used to Agile, international teams; native Italian and Portuguese, English C1.

AREAS OF EXPERTISE

FRONT END	React, Next.js (App Router), TypeScript, JavaScript (ES6+), Tailwind CSS, Radix UI, shadcn/ui, Framer Motion, SASS, Zustand, PWA / Workbox, i18n (next-intl)
BACK END & DATA	Node.js, PostgreSQL (row-level security), Supabase, Stripe, IndexedDB (Dexie), Zod, REST APIs, Server Actions, C#
MOBILE	Flutter, Dart
QUALITY & DELIVERY	Vitest, Playwright, GitHub Actions (CI), Lighthouse / Core Web Vitals, Git, Jira, Vercel, Netlify
METHODOLOGIES	Agile (Scrum/Kanban), Component-Driven Architecture, Accessibility, Cross-Functional Collaboration, UI/UX Foundations

PROFESSIONAL EXPERIENCE

FRONT END ENGINEER, STIGA S.p.A. | Castelfranco Veneto (TV), Italy *06/2025 – Present*

Frontend and mobile software engineering for internal corporate portals and smart IoT device management platforms.

- Refactored 12+ legacy web components into modular React & TypeScript interfaces, reducing portal load times by 20% for 100+ daily internal users (employees and dealers).
- Built 5+ cross-platform UI features in Flutter & Dart for the management of smart lawnmowers.
- Work in 2-week Agile sprints within an international engineering team, using Jira and Git.
- Integrate REST APIs with backend engineers, adding strict TypeScript data validation to prevent runtime errors across internal tools.

KEY ENGINEERING PROJECTS

STAFF MANAGER – SHIFT PLANNING FOR BARS & RESTAURANTS | React, TypeScript, Supabase, Stripe *05/2026 – Present*

Live: staff-manager.it · Code: available on request

- Built with Caffè Commercio (Asolo, Italy) and in daily use there: the week planned from a phone, time-off requests, shift swaps between colleagues and a monthly hours report for the payroll consultant.
- Kept every rule in Postgres with no server of its own: row-level security for owners, managers and employees, a SECURITY DEFINER function for each multi-step action and an activity log written by the database that nobody can edit; 17 SQL test suites and 84 unit tests.
- Warns before assigning a shift that leaves less than the 11 hours of rest required by Italian law; Stripe subscriptions (checkout, customer portal, webhooks) and push notifications through Netlify Functions; installable app.

SCALETTA – OFFLINE-FIRST SETLIST APP (PWA) | React, TypeScript, Dexie, Supabase *10/2026 – Present*

Live: test-scaletta.netlify.app · Code: github.com/KaweAW/setlistmaster

- Designed a local-first architecture: every edit is written to IndexedDB first and synced to Supabase through an outbox (cursor-based, idempotent), so the app stays fully usable offline on stage.
- Enforced band roles (creator, editor, viewer) with Postgres row-level security and tested the policies on a real Postgres (PGlite), including the cases where a stranger must not read or write anything.
- Kept the domain logic pure (chord parsing, transposition, undo/redo) with ESLint-enforced module boundaries; about 350 unit, UI, database and end-to-end tests, GitHub Actions CI, installable PWA, English/Italian interface.

TEMPLATE ZERO – RESTAURANT WEBSITE & QR MENU | Next.js 15, TypeScript, Tailwind 4 *10/2026*

Live: template-zero.vercel.app · Code: github.com/KaweAW/template-zero

- Built a reusable template customised for each client from one JSON file: 4 languages (DE/EN/IT/FR) with localised URLs, static generation and a QR-code table menu.
- Reached 100/100/100/100 Lighthouse (mobile) on the deployed site, with LCP 0.5–1.5 s, CLS 0 and under 112 KB of gzipped JavaScript on the main pages.
- Added a booking form with Zod validation, a Server Action and rate limiting (Upstash Redis with in-memory fallback); 29 unit tests, 24 end-to-end tests (Playwright) and CI on Node 20 and 22.

MEDICAL PRACTICE PLATFORM (CLIENT PROJECT) | Next.js, TypeScript, Tailwind CSS, shadcn/ui, Radix UI, Vercel *02/2025 – 08/2025*

Live: dottmaicobattistello.it · Code: github.com/luisacochran-cmyk/dott.maicobattistello

- Built a Progressive Web App with the Next.js App Router, React and Tailwind CSS for a medical practice, deployed on Vercel.
- Implemented accessible UI components with Radix UI and shadcn/ui, simplifying patient consultation bookings; Core Web Vitals score of 95+.

ANIMATOR & STORYBOARD ARTIST PORTFOLIO (CLIENT PROJECT) | Next.js, TypeScript, Tailwind CSS, Vimeo, Vercel *09/2025*

Live: tommasotamburini.com · Code: github.com/KaweAW/tommasotamburini

- Built a media-rich portfolio with 2D animation and Disney/Netflix storyboard showreels, using Vimeo API embeds and custom Radix UI modal players for smooth playback on mobile and desktop.

EDUCATION

Higher Technical Diploma in Front End Development (EQF Level 5) – *ITS Academy Alto Adriatico (09/2024 – 07/2026)*

Intensive 2-year tertiary vocational degree focused on software engineering, Next.js, React, TypeScript and database systems.

High School Diploma (Linguistic) & French General Baccalauréat – *Liceo Brocchi (09/2018 – 07/2023)*

Dual-diploma international programme emphasising linguistic mastery and cross-cultural communication.

LANGUAGES & WORK AVAILABILITY

Languages: Italian (Native), Portuguese (Native), English (C1 - IELTS), French (B2), German (B1), Russian (A2)

Work Availability: Open to full-time roles and freelance projects; relocation within the Schengen area and remote work.
